

Knoll Selects ENGIE North America to Source Renewable Hydro Energy

As part of the MillerKnoll collective, the company's East Greenville, PA facility is now part of its plan to purchase renewable energy

East Greenville, PA - April 22, 2022 – Knoll announced today, as part of MillerKnoll, Inc. (NASDAQ: MLKN) that it has entered into a two-year agreement with ENGIE Resources LLC, a subsidiary of ENGIE North America, to purchase renewable energy from the Brookfield Renewable U.S. Smoky Mountain Hydropower Project in NC and TN. This renewable energy purchase, which includes 17,000 Renewable Energy Certificates (RECs) produced by the Smoky Mountain Hydropower Project, matches 100% of the company's forecasted load at its East Greenville, PA facility.

The East Greenville facility accounts for approximately 10% of MillerKnoll's global energy consumption. The 17,000 MWh of renewable energy purchased under this agreement is equivalent to the annual energy consumption of 1,518 homes, according to U.S. EPA* estimates.

Furthering the company's investment in sustainability, this facility joins MillerKnoll's Spring Lake, MI campus with a 100% renewable energy commitment. Together, these two facilities account for nearly a quarter of the company's global energy consumption.

"Our transition to renewable hydro energy at this facility greatly reduces our environmental footprint and supports our commitment to the planet," said Gabe Wing, Director of Sustainability at MillerKnoll. "We will continue to increase our investments in renewable energy across our global footprint wherever possible, eliminate waste, and source safe and sustainable materials as we continue our journey of using our business to design a better world."

For 2022, MillerKnoll will purchase approximately 17,000 megawatt-hours of renewable generation from the Smoky Mountain Hydropower portfolio located on the Little Tennessee and Cheoah rivers in TN & NC. The assets hold certification by the Low Impact Hydropower Institute, a designation for generation facilities that meet stringent environmental standards. The hydropower portfolio is owned and operated by Brookfield Renewable U.S.

This investment is in line with the company's commitment to have a positive environmental impact. MillerKnoll partners with [Foresight](#) Management, an energy management firm headquartered in Grand Rapids, MI, to evaluate and implement procurement strategies across all facilities and business units aimed at reducing costs and increasing its renewable energy consumption.

The East Greenville facility has been Knoll's manufacturing hub since it opened in the early 1950s. Today the two-building campus is home to both office and manufacturing team members. The facility is comprised of a wood shop, metal shop and upholstery shop in addition to numerous product assembly lines, including Knoll task seating, workplace collections including Antenna Workspaces and Dividends Horizon, and the classic Barcelona Chair.
