

Geiger to Feature First Outdoor Collection and Display Full Product Lineup During MillerKnoll Design Days

While Highlighting its Crosshatch Outdoor Collection, the brand will also show new seating and office solutions alongside new and custom offerings from DatesWeiser

ATLANTA, June 7, 2023 -- Geiger, part of the MillerKnoll collective, will return to Design Days this year with its Crosshatch Outdoor Collection, the brand's first outdoor furniture collection. In the showroom, guests will be able to experience some of Geiger's new ancillary offerings such as the Full Loop Office and Lounge Chair and a new Low Arm version of the classic Ward Bennet Bumper Chairs. There are also four new Private Office solutions featuring Geiger One's Casegoods, two conference rooms featuring DatesWeiser Tables, and an impressive entrance with a full Natural Oak Veneer Wall and Custom DatesWeiser Reception Desk.

The Crosshatch Lounge Chair and Ottoman, along with the Crosshatch Settee, have been redesigned with new materials such as teak and Sunbrella fabrics, and are now joined by a coffee table and side table to comprise Geiger's first outdoor furniture offering. The [Crosshatch Outdoor Collection](#) will be featured on the fourth-floor terrace at Fulton Market, and like its indoor predecessor, the Crosshatch Outdoor chair and settee are designed with parachute chords, a material common to other industries, but not traditionally used in furniture. The parachute chords create a lattice held taut to support the gracefully curved wood frame and envelop you like a nest as you sit and will not stretch over time. The transparent aesthetic of both the outdoor lounge chair and settee allows it to look appropriate whether in the garden at home or out on an office patio. Paired with the coffee or side table, they form an inviting collection for gathering outdoors. Geiger Crosshatch Outdoor Collection smoothly transitions to an array of open-air spaces, whether by the pool, a café or rooftop lounge.

The Geiger Showroom will feature the [Full Loop](#) Office and Lounge Chair. The Full Loop Office Chair, designed by EOOS, is a versatile chair that's ahead of the curve and strikes a poetic balance of form and function. The design blends subtle curves, rich materials, and exceptional comfort in a way that enhances its surroundings--from conference rooms to home offices. The Full Loop Lounge Chair adds just the right amount of recline for relaxation; offering users a place to enjoy a few moments of respite at home or in the office. The Full Loop Chair is available now and comes in numerous textile and leather options to create an office chair that truly expresses the user's aesthetic.

The [Bumper Chair](#) is an artfully simple chair designed with an emphasis on comfort, yet stylish enough to make a statement in conference rooms, executive offices, and home offices alike. The deceptively simple design is nearly seam-free, with the arm cap, inner shell, and outer shell shaped from one continuous piece of upholstery material. The Bumper Chair is now available with low arms that make it easy to avoid the underside of desks or tables.

Originally launched at NeoCon in 2019, the award-winning [Geiger One Case Goods](#) Collection is the culmination of decades spent working alongside interior designers to create luxury, custom configurations for clients of all sizes. By using a collection of unique yet easily configurable parts, Geiger One Casegoods offers a versatile infrastructure that creates spaces that feel custom with ease. At this year's Design Days, Geiger will showcase its Geiger One Private Office Solutions which utilizes many of the same components in different applications to create spaces that prioritize function, and are brought to life through the beautiful, unmistakable craftsmanship

of the Geiger brand. With a broad spectrum of matte and low-sheen finishes, customers can customize Case Goods and seating with a modern palette of veneers that inspire durable and beautiful office spaces.

This year at Design Days, DateWeiser will display a Custom Reception Desk made in Honed Nero Marquina Marble with Rift Cut American White Oak. The desk is available by special order and clients can work with a dedicated DatesWeiser team to collaborate and develop a design that works best for their space.

The [JD Waterfall Table](#) by DatesWeiser will be on display in the Geiger showroom. The Table is a powered meeting table designed for impromptu meetings and casual collaborations that happen in open spaces. It's available in two heights and invites and supports conversations that begin spontaneously then turn substantive. With exquisite wood finishing and miter-fold construction that highlights the woodgrain as it "flows" over the table's edges, this is a table that speaks to beauty's ability to inspire. The JD Conference Table marries a simple architectural design with DatesWeiser's hallmark quality and craftsmanship. The Table is a flexibly designed platform that seamlessly integrates power and data—creating high performance meeting rooms, board rooms, and other collaborative spaces that meet the needs of work teams.

The Highline 25 Credenza creates distinguished meeting spaces through choice and craft. Customized to the needs of the most discerning clients, Highline Credenzas express confidence, quality, refined ingenuity, and integrated technology, which caters to the decision makers, the dreamers, and the doers alike. The Highline 25 Credenza features recessed metal legs and a streamlined case with multiple configurations of drawers and cabinets epitomize the refinement and versatility of the product. Available in a wide range of finishes, credenzas can accommodate A/V equipment, cool drawers, and trash units.

The Highline Fifty Conference Table is designed for confidence and to reflect the client's full potential. This conference table makes a dynamic statement, furnishing spaces with a vision that combines strength and style. Available in rectangular and boat shapes, Highline Fifty Conference Tables provide the framework for large meetings, video conferences, or a place to touch base and collaborate. Technology is available at the tabletop or through an integrated drawer and can be easily adapted to meet the needs for expanding technology demands.
