

Colebrook Bosson Saunders Unveils Dynamic Flo X Multi Monitor Arm

August 5, 2024 | LONDON– Colebrook Bosson Saunders (CBS), a leader in ergonomic products, announces the launch of the Flo X Multi, a new monitor arm for large format and multi-screen support that redefines the way professionals interact with multiple screens in the modern workplace.

Designed to cater to the changing needs of today's professionals, Flo X Multi brings a level of ease in screen adjustment. The monitor arm supports two or three screens, including curved and oversized models, with a single tilt mechanism that makes it simple to adjust all screens simultaneously.

Flo X Multi has effortless side-to-side rotation, providing users with the freedom to arrange their screens in various flat to continuous screen configurations. This flexibility creates a harmonious single-screen experience that adapts to the preferences of each user.

Having multiple monitors doesn't have to mean a tangle of cables as the Flo X Multi has the capacity to keep them neat, tidy, under control and out of sight.

“Our innovative Flo family of monitor arm set a new standard for supporting new technologies in their workplaces set-up,” commented Andy Humphreys, Managing Director of Colebrook Bosson Saunders. “Flo X Multi adds an entirely new level of functionality that will allow users to be more productive, able to engage with their work in a new way.”

The Flo X Multi is the latest addition to CBS' award-winning Flo Monitor Arm Family, which is known for its easy installation and operation, versatility, and ability to work in multiple configurations.
