

FilzFelt Launches Nest Baffle, a Series of Contoured and Linear Acoustic Panels

November 13, 2024—FilzFelt, an industry leader in sustainable acoustic products that feature 100% Wool Design Felt, proudly presents Nest Baffle. This innovative series of hanging acoustic baffles includes two rounded and one linear baffle, offering endless pattern configurations to suit any space.

The Half Round, Quarter Round, and Linear baffle—which are available at custom heights—allow designers to craft unique layouts that bring depth and dimension to any space. Whether spanning large, open areas; hovering strategically above furniture to encourage collaboration; or positioned to create defined, intimate zones, these panels help dampen sound and add visual interest overhead. Choose

from one of twelve standard configurations or create a custom layout tailored to meet the specific needs of any environment.

Nest Baffle and its standard configurations were designed by Boston-based designer Kelly Harris Smith. Kelly Harris Smith has been designing products for FilzFelt since its founding in 2008. Her products have ranged from colorful space dividers to textile-inspired wall patterns and tiles

Key Features

Composition: 100% Wool Design Felt (100% biodegradable and compostable) and Akustika 10 substrate (contains 60% post-consumer recycled content and is 100% recyclable)

Colors Available: 95

Noise Reduction Coefficient (NRC): 0.70

Environmental/Sustainability: Living Building Challenge Criteria Compliant, Oeko-Tex® Standard 100 Certified Product Class II, meets VOC test limits for the CDPH v1.2 method, Prop 65 Compliant

Installation: Installs with two to three sliding attachment points to ceiling

"Wool felt inherently softens environments, and with the Nest Baffle, I want to amplify that effect. They not only add warmth through material and texture but also exist to absorb sound, creating a more inviting and tranquil atmosphere. My goal is for these baffles to provide a sense of comfort and calm in any setting." —Kelly Harris Smith, designer of Nest Baffle

About Kelly Harris Smith

Kelly Harris Smith is an award-winning designer and creative director specializing in natural and sustainable materials in commercial and residential interior design. By balancing intricacy and simplicity, Kelly's designs are distinctive for their pattern, color, and innovative functionality. Whether she's creating small accessories or large interior architecture installations, Kelly begins her design process with a thoughtful analysis of how people will interact with the product or environment.

About FilzFelt

FilzFelt is an industry leader in sustainable acoustic products that feature 100% Wool Design Felt, available in over ninety colors. Collaborating with talented designers worldwide, FilzFelt combines high-performing materials and craftsmanship to create architectural products that are both highly customizable and sustainable. FilzFelt uses the natural fiber wool, harvested from sheep. Sheep's wool is regarded for its crimped, elastic fibers that are easily felted to form a fabric that cannot be pulled apart. This translates into durability, excellent dyeability, resistance to flame and compression, and thermal and sound insulation.
