

Herman Miller introduces the Aeron ESD Chair and Stool for high-performance electrostatic discharge (ESD) environments

The first performance suspension chair designed for ESD workspaces, Aeron ESD reflects the brand's ongoing commitment to ergonomics and problem-solving design

Zeeland, Michigan, May 22, 2025—Herman Miller adds the Aeron ESD Chair and Stool to the award-winning Aeron Chair family—the first performance suspension chair designed specifically for electrostatic discharge (ESD) environments. Originally designed by Bill Stumpf and Don Chadwick, the Aeron Chair revolutionized office seating when it debuted in 1994. Since then, it has continued to evolve through material and design updates. In partnership with designers, the brand has made pioneering updates to improve the chair's comfort and performance. Since 2021, the entire Aeron Chair lineup has also incorporated ocean-bound plastic.

With the Aeron ESD Chair and Stool, Herman Miller addresses the need for comfort and support in ESD-sensitive environments commonly found within the tech, semiconductor, and innovation sectors—such as clean rooms, data centers, laboratories, and electronics assembly areas. ESD workplaces have special requirements when it comes to furnishings—especially seating, which can be a major source of electrostatic discharges.

Aeron's research-driven technology supports the unique needs of individuals, while adhering to global ESD standards. The brand's 8Z Pellicle suspension distributes weight evenly and provides thermal comfort. Adjustable PostureFit SL supports the spine at the base. Harmonic 2 Tilt offers a smooth, balanced recline. While many brands take a "one size fits all" approach to ESD-approved chairs, Herman Miller offers a choice of two chair sizes and two-cylinder heights, providing a more exacting fit across backrest height, seat width, tilt mechanism, and base size.

Unlike traditional ESD seating made from foam, fabric, or leather, Aeron ESD is the first of its kind to feature a performance suspension system. It's also composed of over 65% recycled materials, including ocean-bound plastic, helping organizations meet their sustainability goals.

The Aeron ESD Chair and Stool are now available to contract customers through authorized Herman Miller and MillerKnoll dealers globally. Visit the Herman Miller [website](#) for your region for more information.

About Herman Miller

Over the last century, Herman Miller has been guided by a commitment to problem-solving designs that inspire the best in people. Along the way, Herman Miller has forged critical relationships with the most visionary designers of the day, from mid-century greats like George Nelson, the Eames Office, and Isamu Noguchi, to research-oriented visionaries like Robert Propst and Bill Stumpf—and with today's groundbreaking studios like Industrial Facility and Studio 7.5. From the birth of ergonomic furniture to manufacturing some of the twentieth century's most iconic pieces, Herman Miller has pioneered original, timeless design that makes an enduring impact, while building a lasting legacy of design, innovation, and social good. Herman Miller is a part of MillerKnoll, a collective of dynamic brands that comes together to design the world we live in. For more information, visit hermanmiller.com/about
