

Geiger DatesWeiser Introduces New Seating & Conferencing Designs at Fulton Market Design Days 2025

Brands to debut Lijn Chairs and Stools by Carole Baijings for Geiger and Ascent Conferencing Collection by EOOS for DatesWeiser at reimagined showroom at 1100 West Fulton Market

Chicago, IL, June 9, 2025 – At this year’s Fulton Market Design Days, Geiger DatesWeiser invites the design community to its reenergized showroom in Fulton Market, redesigned to bring the brands together in a striking dialogue, presenting a distinct vision for thoughtful contemporary workplaces. The refreshed environment features full floor plate solutions spanning sophisticated, high-performance conference settings, inspiring private offices and engaging hospitality spaces.

Guests are invited to explore new designs including the bold and graceful **Lijn Chairs and Stools by Carole Baijings** for Geiger, and **Ascent Conferencing Collection by EOOS** for DatesWeiser, a sophisticated collection that innovatively integrates technology. Blending the vision of internationally renowned designers with Geiger and DatesWeiser’s impeccable craftsmanship, the new collections reinforce the brands’ dedication to customization, offering an array of premium designs that elevate any environment.

“At Geiger DatesWeiser, craftsmanship has always been at the heart of everything we do. This year marks an exciting evolution of our portfolio with two dynamic new introductions. We have a new vibrant and sophisticated color palette and minimalist seating from Carole Baijings that bring a fresh look for Geiger. We also have a bold new conferencing line by EOOS for DatesWeiser that redefines the possibilities of the modern workplace,” said **R.J. Stelter, Sr. Vice President & General Manager at Geiger DatesWeiser**.

Lijn Chairs and Stools by Carole Baijings

Demonstrating a meticulous attention to detail, the **Lijn family of side chairs, armchairs and stools** is thoughtfully crafted to balance functionality with refined visual appeal. Named after the Dutch word for "line," the chairs merge a contemporary minimalism with exquisite detailing to strike a graceful profile, enhancing a wide range of interiors. Whether in a sophisticated private office, a dynamic collaborative space, or a premiere hospitality space, the chairs welcome guests with considered comfort in a beautifully sculpted form.

The seating collection merges exquisite color with cutting-edge precision. Known for her mastery of color across various design disciplines, Carole Baijings partnered with Geiger to develop five distinctive tinted wood stains, infusing Geiger's portfolio with a vibrant new perspective. Drawing on the expertise of Geiger's master woodworkers and upholsterers, Baijings translated her vision into a sculptural design that embodies technical rigor and artistic expression.

Ascent Conferencing Collection by EOOS

With the introduction of Ascent Conference Tables and Credenzas, Austrian design team EOOS and DatesWeiser elevate conferencing through meticulous craftsmanship and near-bespoke customization, exemplifying EOOS's poetic analysis approach. The result is an impressive collection that not only enhances the space but also empowers people to achieve more.

"The tension between highly industrialized details and timeless craft is one of the themes we see in Geiger DatesWeiser. This collection is essentially a dialogue between these two seemingly contradictory things," commented **Gernot Bohmann on the**

EOOS team.

Exceptional details reimagine the meeting experience: a next-generation protective edge keeps chair arms from marring the table – and vice versa; team members can charge their devices through a range of power access options; a handsome leather cover conceals the trough when not in use; and visual clutter is reduced through the seamless integration of wires and cables, neatly concealed within the table's legs or cable manager. Ascent Tables can uplift any space, offering a wide range of sizes, shapes, and premium surface materials—including glass, leather, stone, and veneer.

Ascent Credenzas reinvigorate this central conference room design, featuring premium details such as softly curved edges and a minimal pull design that allow the exceptional wood material to shine. Meticulously finished on all sides, Ascent Credenzas extend beyond the conference room, doubling as elegant space dividers. Amenities such as a cooling drawer for refreshments, concealed waste bins, and dedicated storage for hosting essentials or technology, seamlessly combine form and function.

The Lijn Chairs and Stools and Ascent Conferencing Tables and Credenzas will be available to purchase through Geiger DatesWeiser Dealers and MillerKnoll dealers in Fall 2025. Learn more about [the collections](#).

JD Meeting Table

DatesWeiser will introduce the JD Meeting Table, a striking extension of the JD line by DatesWeiser. Expanding the possibilities for more intimate and purpose-driven environments, the brand is adding a new assortment of shapes and sizes tailored for smaller spaces to its portfolio, including four refined tabletop shapes and five new base designs.

Geiger will also welcome a new, contemporary colorway to its exceptional veneer selection: Nordic Oak. Known for its timeless and minimalistic appearance, Nordic Oak aligns with Geiger DatesWeiser's commitment to the highest standards of craftsmanship, using only the top one percent of all architectural-grade veneers.
